What Are Figures of Speech?

Figures of speech are the fantastic little quirks in our language that make writing interesting. Typically divided into two types – tropes and schemes – figures of speech are structural and content-driven stylistic choices that add character and clarity to the way readers interpret writing.

What Are Tropes?

Tropes are figures of speech that deviate in some way from the literal or ordinary meaning of words and phrases. You've probably heard of things like metaphors and similes – these are two of the many tropes you have at your disposal to enhance complexity, interest, and literary allusion to your writing.

- Auxesis:** Use of a term to describe something disproportionately less significant than the term implies
- Litotes:** Deliberate understatement
- Meiosis:** Use of a term to describe something disproportionately greater than the term implies

Inversions

- Rhetorical Question:** Asking a question for a purpose other than to get an answer
- Irony:** Use of terms to convey a meaning opposite of the terms' literal meaning
- Oxymoron:** Placing two opposing terms side by side
- Paradox:** Contradictory phrase that contains some measure of truth

Schemes

Balance

- Parallelism:** Similarity in structure between words and phrases
- Antithesis:** Juxtaposing two contradictory ideas
- Climax:** Ordering words and phrases in order of increasing importance

Word Order

- Anastrophe:** Inversion of natural speaking word order
- Parenthesis:** Insertion of terms or phrases that interrupt the natural syntactical flow

- Apposition:** Addition of words to clarify or elaborate what came before

Omission/Inclusion

- Ellipsis:** Omission of words implied by context
- Asyndeton:** Omission of conjunctions between clauses
- Brachylogia:** Omission of conjunctions between a series of words
- Polysyndeton:** An overabundance of conjunctions

Repetition

- Alliteration:** Repetition of consonants in two or more words
- Assonance:** Repetition of similar vowel sounds
- Polyptoton:** Repetition of words derived from the same root
- Antanacsis:** Repetition of a word used with more than one meaning
- Anaphora:** Repetition of the same word or phrase at the beginning of successive clauses
- Epistrophe:** Repetition of the same word or phrase at the end of successive clauses
- Epanalepsis:** Repetition of a word at the end of a clause that was used at the beginning of the clause
- Anadiplosis:** Repetition of the last word of one clause at the beginning of the following clause
- Climax:** Repetition of anadiplosis at least three times, arranged so as to increase in importance each time
- Antimetabole:** Repetition of words in successive clauses, but in reverse grammatical order
- Chiasmus:** Repetition of grammatical structures in reverse order in successive phrases or clauses

What Are Schemes?

Schemes are rhetorical adjustments to writing that make text read more smoothly and even sound more persuasive. Schemes deal with the structure of your sentences and where you position words and clauses.

Why Should I Care?

If the purposes of writing are to engage your readers, help them understand, and persuade them, then you need to know the tools at your disposal to be all three of those things: engaging, comprehensible, and persuasive. Beyond the basic ability to use grammar correctly, the figures of speech are among your most valuable tools to becoming a fantastic writer.
